

Reproductive Resources for KCS Project Presentation

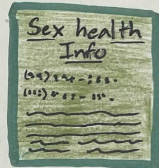

By: Simona Ylaite Russell and Claire Eller

REPRODUCTIVE RESOURCES FOR KCS

Our First Step

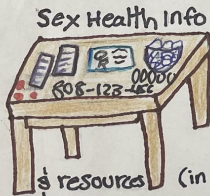

Call and reach out to sex health organizations on Maui to inquire about donations, information and insight.

How can we protect the students from teen pregnancy and provide resources to help educate and improve the sexual health education here at KCS?

our vision:

A booth in the KCS bathrooms that provides condoms, and other available contraceptives. We will provide information through pamphlets regarding birth control, STD, abortions, and creating healthy sexual relationships

750,000 teen pregnancies per year

Parenthood is the leading reason teen girls drop out of school

Possible Mentors:

- Amy at Planned Parenthood
- Nancy with School based Health Alliance

3 in 10 teen American girls will get pregnant at least once before age 20

why our project MATTERS

1 in 4 teens contract a STD every year

Mentors/Assistants

- Nancy Rodriguez from School based Health Alliance
- Danny Lopez from Planned Parenthood
- Ms. Cassie
- Our parents
- Our friends have helped us come up with ideas
- Receptionists at Planned Parenthood

Milestones So Far

- Met with mentor Nancy Rodriguez with school based health alliance.
- We visited Planned Parenthood in Kahului, and talked to them about supporting our project, and providing donations
- Emailed and had conversations/set up a meeting for supplies with Danny Lopez
- Scheduling meeting with Planned Parenthood

KCS junior project help resources

Aloha,

My name is Simona Ylaite Russell and I am a junior at Kihei Charter High School. At Kihei Charter we are required to create a junior project. With a peer of mine (Claire Eller), our project is to help improve the sexual health education. Our vision is to create a booth located in the bathrooms that the students can utilize, that provides sexual information and resources that could help support the students with sexual health needs and preventing teen Pregnancy at KCS. We went into planned parenthood and we were referred to you by the front desk. If you or your organization could help supply resources or donations such as condoms, contraceptives, pamphlets and or insight, that would be amazing.

Thank you for your time,
Simona Ylaite Russell

Hi Simona,

Thank you for calling; it was nice to talk and get an idea of what you were looking for. Here is an email with a summary of what we talked about. I am going to CC my manager, Lacy, in this response.

I do not have any time on my calendar this week, but I'll be able to get supplies for you next week. It sounds like you were interested in getting a few flyers, condoms, and you wanted to create your own posters to put up at KCS with QR codes so your classmates could quickly access helpful info. You were also interested in getting info on our Chat/Text program to share with classmates.

Here is what we will do:

- I'll set up a packet of brochures and condoms for you to pick up from the clinic sometime next week. I ask that you email me at the start of next week so we can coordinate a time that works so that the clinic knows you'll be coming.
- For your posters and QR codes, I would follow [this link](#) and explore. If you dig deep enough, you'll find cool pages like these examples on [Birth control methods](#), [Sexual and Reproductive Anatomy](#), [STDs](#), and so much more. You should be able to make QR codes using google or another app.
- I've attached a couple info flyers that you can print out too. They have some great resources.

Timeline/Goals Not Met

- So far, our timeline has worked out to a certain extent.
- Some of the steps have been done out of order, but we are still on track for the week of 9/29
- Setbacks:
 - When we emailed Ms. Whitney at Maui Community Clinic (the head of Human resources) on August 25th, we never received a response.

Your timeline should be specific and include **ALL** of the major steps that may include, but is not limited to the following:

1. Meet with Nancy - Thursday 18th
2. Start one pager - thursday 18th
3. Reach out to mentors and make dates to meet with them
4. Reach out to planned parenthood/and other community organizations - 22nd
5. Talk with our mentors and find organizations who can fund our project
6. Start slideshow - thursday 25th
7. Research pregnancy statistics add to slideshow- thursday 25th
8. Approach Kihei Charter admin with idea -Friday 26th
9. Research sex health educational videos and websites
10. Progress posts on wednesdays
11. Start Printing/making pamphlets to add to booth- week of 9/22
12. Meet with clinics to get resources - week of 9/22
13. Donation of resources drive? -Week of 9/29
14. Build booth/dispenser?- week of 10/3
15. Create final documentation/ final product- week of 10/14

16. Progress presentations Weeks of 9/19 and 10/14
17. Finish Final Reflection -Due the week of November 12th
18. Documentation/Final Product -Due the week of 12/1
- 19.

Challenges and Surprises

- We have been challenged with connecting with people in our community to gain knowledge and resources.
- We were challenged with finding a way to get resources for sexual education without paying a lot of money.
- We were surprised with the amount of people willing to support our project
- We were surprised with the easy connection and discussion with planned parenthood about our junior project plan

Next Steps

- Researching sexual education and creating pamphlets for bathrooms
- Find out details of getting a dispenser
- Picking up resources from Danny Lopez at Planned Parenthood
- Deciding on Final documentation
- Maybe writing grant

THANK YOU!

Any Questions?
